EL SALVADOR

ANNUAL BUDGET SUBMISSION (ABS)
FISCAL YEARS 1994-1995

El Julvador

MISSION DIRECTOR'S NARRATIVE STATEMENT

Emerging from 12 years of civil war, El Salvador is struggling to rebuild economically, socially and politically -- and putting into effect strategies and programs intended to result in a truly democratic society with opportunities for a better life for its citizens.

Through an assistance program which could literally mean the difference between war and peace, USAID/El Salvador is playing an important role in helping El Salvador in this effort and is working with other bilateral and international donors to maximize the impact of external assistance. The strategic objectives of the USAID program are to:

- Assist El Salvador to make the transition from war to peace

Development activities are designed to reactivate the factors of production to respond to economic opportunities, reestablish access to basic services, build local level democratic institutions and increase civic participation.

- Increase equitable economic growth

Assistance elements focus on helping El Salvador create and maintain appropriate, market-oriented economic policies and on increasing private investment, exports, and employment.

Promote enduring democratic institutions and practices

Activities support aim to strengthen citizen participation in the decision-making process (including support for the 1994 elections), improve procedural protections and impartiality in the judicial system, and improve public sector financial management and accountability.

- Improve health and education of Salvadorans

Assistance seeks to increase the efficiency and effectiveness of primary education and achieve three major health/population outcomes which would increase contraceptive prevalence, expand the numbers of Salvadorans receiving health and child survival services, and increase the number of rural households with access to potable water.

- Improve environmental and natural resource management

Assistance elements work to create and implement the policy and legal framework for natural resource use, increase public awareness of environmental problems, and improve productive activities consistent with better natural resources management.

The various elements of the USAID/El Salvador program, including all proposed new projects, are directly supportive of these strategic objectives and the Agency's four newly-defined priority areas: population and health, the environment, democracy and economic growth.

At the projected 100 percent funding and staffing levels in FYs 1994 and 1995, USAID/El Salvador can continue to make rapid progress toward achievement of objectives and manage the program in an efficient, effective manner. The Mission believes it is crucial to hold planned levels through the March 1994 elections and the installation of a new democratically-elected government in June 1994. Strong budget levels will demonstrate continued U.S. commitment to the peace, national reconciliation and reconstruction efforts. At the same time, they will enable the Mission to maintain momentum in consolidating and extending the democratic reforms and deepening efforts in the social sectors, the environment, and the economy as a whole to accomplish sustainable growth.

At the 75 percent level in FY 1994 and 95, the program would slow, and a longer period of time would be required to meet objectives, but progress would continue to be made. On the OE side, the Mission capability for maximum oversight and accountability would be decreased at the 75 percent level. However, by continuing to seek ways to increase the productivity of all existing staff resources — U.S. Direct Hire, Foreign Service National and Personal Service Contract — USAID/El Salvador would expect to be able to manage a viable program with significant development impact. As all in the A.I.D. community are well aware, ongoing activities have a momentum and commitment that require management even if no additional funds are obligated.

At the 50 percent or "doomsday" level, major damage is done to program levels, and at least one primary element needed for success in the achievement of democracy could not start up. A cut of more than 25 percent of the present OE level would be disastrous. By that point, the Mission would have given up all possible discretionary funding, and the full impact would fall on staff cuts within a very compressed period. It would be extremely difficult to manage the ongoing program with even a minimal level of oversight and accountability, and USAID/El Salvador's development impact would be greatly reduced.

1

The USAID program is a dynamic and significant element in the development aspirations of the people of El Salvador. It is also useful and important to the interests of the United States. USAID, as a development leader in concert with other donors and private entitles, has an unmatched opportunity for development success and human progress in an area of the world starved for both. I am pleased to have been named to lead this exciting program and the USAID team working for the achievement of these objectives.

Charles E. Costello Mission Director USAID/El Salvador

FY 1994 NEW PROJECT NARRATIVE

PROJECT TITLE: Public Sector Accountability, 519-0396

DA FUNDING: FY 94: \$4,000,000; LOP: \$10,000,000 (G) over 5 years

A. <u>ACTIVITY PURPOSE</u>: Increase the efficiency of Government of El Salvador (GOES) financial management and the accountability of civil servants for public funds.

B. RELATIONSHIP TO MISSION STRATEGIC OBJECTIVES AND AGENCY POLICY:

The activity is directly supportive of both the Mission Strategic Objective to promote enduring democratic institutions and practices and the Agency Policy Area of Democracy.

C. <u>DESCRIPTION AND EXPECTED OUTPUTS</u>:

Through technical assistance and policy dialogue, USAID will support reforming financial structures and administration while promoting transparency, honesty and efficiency in government. The proposed project will help the GOES establish a modern integrated financial management system and a modern independent audit function. The improved system will speed payment processing for suppliers, maximize the collection of taxes and fees, make it possible for the GOES to earn interest on idle resources, minimize GOES borrowings, and produce auditable financial reports on the operations of GOES activities. The project will also promote an independent audit agency to assure fair, objective, reliable government financial and performance reporting. Working through the Ministry of Finance and the Court of Accounts, the project will assist the GOES to modernize its financial management laws, regulations, and procedures in order to achieve decentralization of financial management functions and increase government efficiency at all levels.

D. PERFORMANCE PROGRESS INDICATORS:

- improved management of public funds
- increased efficiency
- increased decentralization in GOES budget decisions
- improved and reliable tax and cost-recovery mechanisms
- conversion of public audit process to a modern post audit system
- decentralized GOES accounting system in operation
- improved cash management procedures at the Ministry of Finance
- improved prompt payment of suppliers
- regular professional audits of GOES institutions and programs
- standardized internal control assessments in GOES institutions
- transparent system for tax administration and improved tax collections, enforced by the legal system.

FY 1994 NEW PROJECT NARRATIVE

PROJECT TITLE: Agricultural Sector Modernization, 519-0397

<u>DA FUNDING</u>: FY 94: \$3,000,000; LOP: \$15,000,000 (G) over 5 years

A. <u>ACTIVITY PURPOSE</u>: To improve the income of Salvadorans who earn their living directly or indirectly from agriculture.

B. RELATIONSHIP TO MISSION STRATEGIC OBJECTIVES AND AGENCY POLICY:

The activity supports the Mission Strategic Objective to increase equitable economic growth, which is equivalent to the Agency Policy Area of economic growth.

C. DESCRIPTION AND EXPECTED OUTPUTS:

This project, in parallel with USAID's non-project Policy Reform package, will support the implementation of critical market-based agricultural reforms by providing technical assistance, training and studies, ensure that proposed reforms are carried out in a timely manner and translated into higher rates of agricultural growth to benefit a majority of the nation's people. Public and private institutions will be strengthened to develop, analyze and implement agricultural policies. The focus will be on making free markets function more effectively and efficiently in the agricultural sector. Reforms in the agriculture sector will be pursued through a policy-based sector approach which includes Economic Support Fund conditionality and sectoral technical assistance in addition to ongoing projects. Using the current agricultural sector assessment as a basis, USAID expects to assist the GOES administration elected in March 1994 to adopt a policy framework which embodies needed policy reforms that would, for example:

- assist the GOES to divest itself of agricultural enterprises;
- encourage demand for improved production and post-harvest technology, increased agribusiness inputs and a more rational allocation of credit to farmers;
- encourage private sector-driven technology generation, adaptation, and transfer, and private sector provision of inputs;
- adjust labor and wage policies to address growing labor constraints;
- deepen reforms for land market systems;
- encourage sustainable land use and diversification of agricultural production;
- increase access to market-rate production credit.

D. <u>PERFORMANCE PROGRESS INDICATORS</u>:

- decrease in families with incomes below the poverty level
- percentage change in productive agricultural employment
- percentage change in dollar value of non-traditional agricultural exports
- development of agricultural policy incentives to modernize production, facilitate trade, increase investment and promote sustainable land use
- privatization of state-owned or -managed agricultural enterprises
- increased financial viability of farmer-owned cooperatives
- increased use of modern production technologies
- improvement of open land market systems

FY 1995 NEW PROJECT NARRATIVE

PROJECT TITLE: Social Sector Reform, 519-0401

DA FUNDING: FY 94: \$5,000,000; LOP: \$15,000,000 (G) over 5 years

A. <u>ACTIVITY PURPOSE</u>: To strengthen delivery of health and education services.

B. RELATIONSHIP TO MISSION STRATEGIC OBJECTIVES AND AGENCY POLICY:

The activity supports both the Mission Strategic Objective which seeks to improve health and education of Salvadorans and the Agency's population and health priority area.

C. DESCRIPTION AND EXPECTED OUTPUTS:

This project will assist the GOES to formulate and implement a series of badly needed social sector reforms and will direct resources toward high priority areas, such as preventive health care and primary education. The project will also help the GOES to institute cost reduction, cost recovery and cost sharing programs. The project will encourage private provision of health and education services and will promote the participation of non governmental organizations. Needed policy reforms to be encouraged through this project, proceeds from forgiveness of debts, and the Economic Support Fund non-project policy reform support include:

- Recover the cost for selected services and products from the direct user on an equitable basis
- Decentralize authority for budget, day-to-day management, and selection of services to lowest cost-effective level
- Increase the role of PVOs and other private sector service providers
- Remove constraints on resource mobilization and investment by the private sector in commercial provision of health and family planning services
- Directly relate planning and delivery of services with analytical studies, e.g. for health, basic education, labor, and poverty, as a guide for allocation of resources within the sectors
- Institutionalize the regular evaluation of the quality of service delivery by public and private providers

D. PERFORMANCE PROGRESS INDICATORS:

- Increased number of children completing the sixth grade
- Reduced infant and child mortality rates
- Reduced malnutrition
- Real increase in ordinary budget outlays for education and health services, higher proportion of outlays for non-salary costs
- Increased contraceptive prevalence (percentage of women using a modern contraceptive method)
- Increase in preventive health measures, e.g. vaccinations, prenatal care
- Increased levels of performance on third and sixth grade achievement tests.

FY 1995 NEW PROJECT NARRATIVE

PROJECT TITLE: Participation and Governance, 519-0403

DA FUNDING: FY 95: \$5,500,000; LOP: \$15,000,000 (G) over 5 years

A. <u>ACTIVITY PURPOSE</u>: To strengthen democratic representation and responsive government structures.

B. RELATIONSHIP TO MISSION STRATEGIC OBJECTIVES AND AGENCY POLICY:

The activity supports the Mission Strategic Objective to promote enduring democratic institutions and practices and the Agency Policy Area of Democracy.

C. <u>DESCRIPTION AND EXPECTED OUTPUTS</u>:

With the end of 12 years of civil war, efforts to create a lasting peace have highlighted the need for accelerated evolution of public and private entities which help mediate social change. USAID/El Salvador plans to use a policy-based sector approach to increase democratic representation and achieve more responsive government. The ESF Policy Reform Program, in conjunction with this project, will work with the Government of El Salvador, other donors and PVOs to effect needed policy reforms, among which are:

- unification of the civil and voter registries
- establishment of legal requirements for public comment periods on proposed legislation and regulations
- implementation of the new labor code
- legal reform to expand coverage of the simplified procedures for land titling
- simplified registration procedures for NGOs

Project-funded technical assistance and training will support implementing these reforms. Activities will focus on: (a) expanding citizen participation and (b) increasing responsiveness/accessibility of key government services. Assistance will be provided to the Legislative Assembly and to the Ministries of Labor and Justice to establish public comment procedures to facilitate citizen participation in public policy making. This participation will be promoted by NGOs focussed on citizen advocacy and alternative information sources, which, as mediating structures in the private sector, serve as channels for popular participation in government and the open dissemination of information and opinion. The project will also provide support to strengthen Salvadoran NGOs and the media to enable these organizations to better foster debate and citizen participation in the public policy making process.

To increase the responsiveness of government, the project will assist the GOES to establish a unified, more efficient civil and voter registry. This will permit issuance of a single national identity card which permits access to voting, government services, and commercial transactions. The project will provide assistance to the Ministry of Interior to improve the agility of the registration process for NGOs. Further, the project will provide commodities and training to the Social Registry, which is applying the Peruvian model for administrative simplification, for expansion of agile property titling procedures to all real property.

D. PERFORMANCE PROGRESS INDICATORS:

- Expanded channels of communication and participation enabling citizens to influence local and national public policy
- Increased citizen confidence in government through heightened efficiency and accountability
- Increased civic participation in the democratic process through stronger multipartisan, private mediating structures for public policy formation, e.g., neighborhood associations, advocacy groups, public interest organizations and media
- Establishment of formal channels, in both legislative and executive branches, for citizen comment on proposed legislation and regulations
- Transparent, agile registration procedures for NGOs
- A unified civil registry and a single citizen identification/voter registration document
- Improved capacity of Ministry of Labor to enforce the new labor code and to use arbitration and mediation in dispute resolution
- Expansion of agile property titling procedures for all real property
